

# How to make a **PRODUCE BAG**

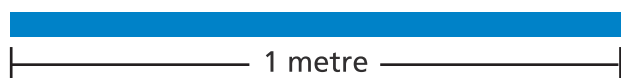

## WHAT YOU NEED...

### DRAWSTRING CORD

Can be a shoelace, ribbon or curtain cord, all are fine!

Large Bag

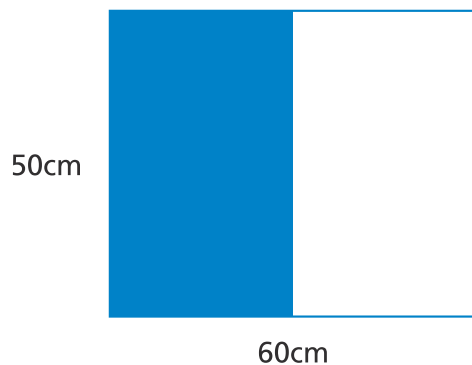

Medium Bag

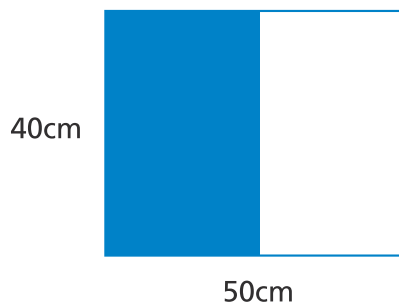

### NETTING MATERIAL

Recycle net curtains, mosquito netting or voile.

Large Bag

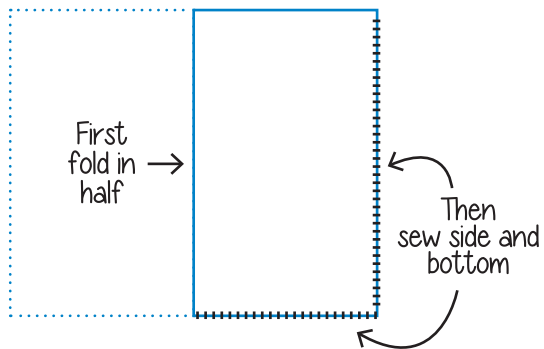

Medium Bag

**NOTE:** These measurements do not have to be exact, it will not matter if the bags are a little larger or smaller (better than wasting material). It is useful to have a variety of sizes. As material is net it has no right or wrong sides

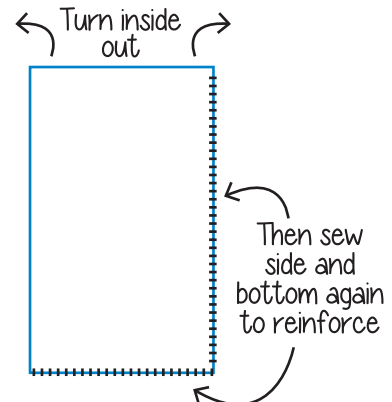

## STEP ONE:

Fold material in half and sew side and bottom.

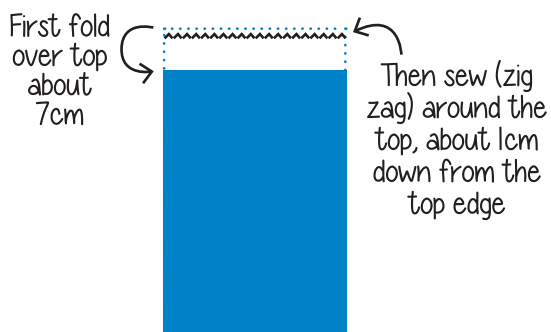

## STEP TWO:

Turn inside out and top stitch over that stitching to reinforce. This is your outer shell now.

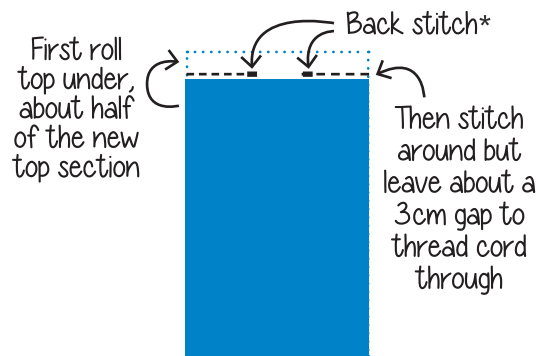

## STEP THREE:

Fold over top about 7cm and stitch about 1cm down from top. Zig zag is easier than straight stitch.

## STEP FOUR:

Roll under about half fabric at top and stitch around leaving open about 3cm gap to thread cord through. Remember to back stitch\* at the opening.

\*Back stitch

## STEP FIVE:

Thread cord through. Knot ends together so they don't come out.

### HELPFUL TIP:

Use a safety pin or similar to help you thread the cord through easily.
