

# appendix 3

# archaeological sites

## AP3 overview

**AP3.i** The table below defines archaeological sites shown on the Planning Maps. All references are in terms of Map Series NZMS 260.

**AP3.ii** 1. Sites with the notation MS refer to Maori archaeological sites, while those with the notation AS are European archaeological sites.

2. Site numbers relate to the NZAA Site Recording Scheme Upgrade Project.

**AP3.iii** Heritage and cultural values can be assigned to sites and areas (either individually or collectively) which are notable for their archaeological values. The Plan acknowledges this, and its objectives, policies and rules reflect the importance of archaeological items (refer to R113 in Chapter 4 and DO4.1 in Chapter 5). One of the methods of identifying and protecting these items is to accurately identify their location, as far as possible. This is described in this appendix.
