Subject: [EXTERNAL] RE: PCE contaminants

Hi [REDACTED]

Good to hear from you. I have cc your request to Adrian the Team Leader of Consents as the first contact for your request.

Are you specifically interested in consents for stormwater discharges as we have several Freshwater rules that relate to discharges, e.g. FWr.20 Point source discharges to freshwater (other than stormwater), FWr.22 Point source stormwater discharges to water, FWr.25 General discharges to land where it may enter water. The Ap28.9 Freshwater rules is attached FYI. We are also receiving stormwater applications for subdivisions discharging sediment greater than Q15 (i.e. higher intensity events above engineering standards) with inclusion of AMPs though these consents may not be operative yet.

Kind regards

Paul

Subject: RE: PCE contaminants

Kia ora Paul
I hope everything has been going well at your end.

Sorry to bother you with this question – I wasn't sure who best to contact in the consents team, so was hoping you can please forward this on or please let me know who best to get in touch with. I'm just following up on some last items for this reporting for the PCE investigation.

Just a quick question regarding stormwater consents - **can someone in consents please let me know the total number of current operational stormwater consents in the Nelson Region** – regardless of monitoring/what contaminants are looked at etc. It is just for gauging an understanding of the representativeness of the data analysed for this project, recognizing it is a sub-set of info etc. So am keen to put it in context.

If you are please able to forward this on to consents, or let me know who best to contact that'd be great.

Ngā mihi nui
